EDUCATION

The Hong Kong University of Science and Technology:

Sep 2026 - Nov 2027

- Master of Science in Finance
- Offer Accepted: Fall 2026 Cohort

The University of Hong Kong:

Sep 2021 - Jul 2026

- Bachelor of Science in Molecular Biology & Biotechnology ~3.3CGPA
- HKUWW Exchange: Konstanz, Germany
- Volleyball Team, Softball Team

RELEVANT EXPERIENCES

Bloomberg Global Trading Challenge 2025:

- Led a 5-person team to manage a \$1M virtual portfolio over 5 weeks, placing in the 72nd percentile globally (758).
- Designed and executed a quantitative, factor-based investment strategy using the Bloomberg Terminal to systematically screen for growth, momentum, and high/low-beta defensive positions.
- Formulated stock selection criteria by evaluating key valuation ratios, earnings momentum, asset betas, and volatility-adjusted metrics.
- Mitigated portfolio downside risk via volatility-adjusted trailing stops and net beta-neutral position to stabilize weekly performance.

J.P. Morgan Chase – Investment Banking Simulation Certificate:

- Completed a simulation replicating the cross-border advisory workflow for an M&A transaction.
- Executed Excel-based sensitivity stress tests to evaluate how changes to WACC, a hypothetical competing bidder premium, and simulated supply chain disruptions would impact the target's valuation range.
- Drafted a 2-page pitch outlining target company profiles, strategy, and transaction logic

BIOL2409 Biotechnology Industry and Entrepreneurship (Received Grade A):

- Developed a value proposition, go-to-market strategy, and commercial assessment for Intellia Therapeutics.
- Conducted market opportunity analysis, competitive research, and investment pitch preparation.

WORK EXPERIENCES

HKU Faculty of Science Undergraduate Research Assistant

Sep 2025 - Dec 2025

- Designed a PRISMA-aligned systematic literature review, including research question formulation and search strategy across multiple databases. Developed a structured, queryable database for the review, extracting and organizing key variables and methodological details from screened studies to enable robust analysis and future meta-analyses.
- Built and implemented a standardized Excel-based data collection/management system, consolidating scattered project data and improving efficiency of data entry and retrieval by 75%.
- Performed data cleaning, quality checks, and dry lab processes aiding in the lab daily workflow.

GUTolution, Innovation Consultant → Automation Solutions Engineer

Jun 2025 - Aug 2025

- Built automated health-forecast models using random forest classification, cutting diagnostic report generation time by 83% (30 min → 5 min) while improving predictive accuracy.
- Led cross-functional collaboration with operations, R&D, marketing, AI, and external partners to align product features with strategic and commercial objectives.
- Conducted competitor and market analysis (financial, regulatory, operational) and helped develop B2B product prototypes and investor pitch decks with market sizing and growth projections.
- Engineered AI-driven outreach tools using API scraping and LLM customization, increasing cold email generation speed by ~80x, and performed scientific due diligence to validate reference ranges and expand diagnostic coverage (adding six bacterial strains).

Mekong Tours Hong Kong, Market Research Analyst Intern

Jun 2022 - Aug 2022

- Collected and pre-processed 500+ data points from CRM, ERP, industry reports, and social media, consolidating datasets for advanced analysis in Excel.
- Built a regression model to forecast demand and presented insights to support strategic sales planning.
- Collaborated with a 3-person analytics team to develop Tableau dashboards visualizing key sales metrics (e.g., profitability, retention) and generated 2 actionable recommendations that were forwarded to leadership.
- Proposed automation of data entry using OCR and implemented data quality checks, projecting a 40–70% reduction in manual processing time and improving data accuracy.

MISC & SKILLS

- **Technical Skills:** Claude Code Workflow, Financial data analysis & modeling (regression, forecasting, DCF), advanced Excel (pivot tables, VBA, Power Query), data visualization & dashboarding (Tableau, PowerPoint), business intelligence & reporting, statistical techniques & quantitative analysis (R, Python - basic), process automation & workflow optimization (OCR, NLP tools, API integration, LLM customization), data storytelling & narrative building, cloud & collaboration tools (Microsoft Teams, Google Sheets/Drive)
- **Languages:** English, Mandarin, Cantonese, Vietnamese
- **Volunteering:** Self-organized Charity Clothing Drive (2020), Animal Welfare Club (2020), Local School Playground Construction Initiative (2019), Chiang Rai Local Home Construction (2018), School Food Drive (2017)
